

CNC Programmer

The Manufacturing Engineer/CNC Programmer is responsible for the development, implementation and continuous improvement of the machining. This position requires extensive machining and CNC programming knowledge of three, five, and six axis routers and the ability to provide hands-on technical support in a production environment. Our work environment requires high accuracy with close tolerances. This position requires knowledge of geometric tolerances needed to inspect completed work with a variety of measuring equipment.

Requirements include:

Strong CNC programming knowledge (G and M code)

Experience in fixture design and tooling optimization

Ability to understand engineering drawings with knowledge of geometric dimensioning and tolerancing

Excellent problem solving and troubleshooting skills

Experience on Okuma OSP controls a plus

Strong technical writing skills

Strong safety, quality, and teamwork orientation with track record of dependability
